APPOINTMENT INFORMATION

You have an appointment with William Boucher, MD. This evaluation involves a detailed review of your history, medical records, and x-rays, and the performance of an examination. Upon your arrival, you will complete a questionnaire and pain inventories that will assist us in understanding your situation. Dr. Boucher will then review the evaluation process with you and advise you of the scope and purpose of the examination and of all records that were available in the preparation and the conducting of the exam. He will then review your history, other available information, and perform a physical examination. He will perform an impartial, fair and thorough assessment of your medical condition in an effort to clarify some of the issues associated with your situation. At the conclusion of the evaluation we will prepare a report and send that report to the requesting client.
